

**AUSTRALIAN PLANTS
SOCIETY TASMANIA INC.**

The Australian Plants Society Tasmania Inc. is part of an Australia-wide organisation made up of people interested in the propagation, cultivation and conservation of plants native to Australia. The objectives of the Society include:

- * to encourage the cultivation and study of Australian plants;
- * to encourage the establishment of gardens in all types of soil and climate for the preservation of the flora of Australia;
- * to support efforts to strengthen the laws and regulations of all bodies given authority by legislation of the Commonwealth and States of Australia for the conservation of Australian flora;
- * to encourage obedience to and the enforcement of laws and regulations with regard to the preservation of the Australian flora;
- * to publish any information that may further the aims and objectives of the Society;
- * to cooperate with other societies, associations or bodies with similar or substantially similar aims and objectives;
- * to promote the knowledge, appreciation and preservation of Australian plants, both in their natural settings and in cultivation, with special emphasis on species indigenous to Tasmania;
- * to promote recognition of the Society as a resource group for educationalists and the government.

* Based on the Society's Constitution

Australian Plants Society Tasmania Inc.

Note: Some groups have daytime meetings in June, July and/or August, or arrange excursions in lieu of night time winter meetings. Refer APST Inc. website Calendar/Activities page for all Group programs: <http://www.apstas.org.au/activities.html> .

HISTORY

After several years of writing about Australian plants for the popular *Your Garden* magazine Mr A J Swaby founded The Society for Growing Australian Plants in Melbourne in 1957. Regions of the Society were set up in most States with the Hobart Group operating as part of the Victorian Region. The Tasmanian Region was formally set up in 1971 with the Northern Group forming in 1978, the North West Group in 1978 and the Kingborough Group in 1993. In 2014 the Kingborough Group merged with the Hobart Group while retaining their monthly daytime meetings. The name changed to *Australian Plants Society Tasmania Inc.* (APST) in 1999. Each Group is represented by elected representatives at Society Council Meetings and Tasmanian delegates attend meetings of the National Society, ANPSA, and also their conferences, to which all members are invited.

ACTIVITIES AND BENEFITS OF MEMBERSHIP

Group monthly meetings have interesting presentations and may include a display table, plant sales, propagation aids, news from other groups, State and National bodies, a sharing of knowledge from specific species Study Groups, changes in taxonomy, access to APS libraries and the sale of current books at discounted prices.

Activities include propagation at Group Nurseries, flower shows, garden visits, wilderness walks and excursions to areas of botanical interest, all to enable members to gain knowledge and “hands on” experience with Australian plants.

Membership cards are provided to financial members. Discounts are offered by some businesses on the presentation of a Membership Card.

The Tasmanian journal *Eucryphia* is published quarterly and all groups also mail and/or email monthly newsletters. An optional quarterly publication *Australian Plants* is produced by APS (NSW) and is a highly recommended journal providing excellent, beautifully illustrated articles relating to Australian plants in gardens and natural environments around the nation.

Study Groups have been set up nationally to investigate the propagation and cultivation of many families of Australian plants such as Acacia, Banksia, Correa, Dryandra, Eremophila, Eucalyptus including *Angophora*

& *Corymbia*, Grevillea, Hakea, Isopogon & Petrophile and Waratah & Flannel flower. Other Study Groups include Food Plants (Australian), Garden Design and Wallum & Coastal plants.

Regular propagation days are scheduled at Group Nurseries to provide plants for members and for sale at flower shows and other events, and thereby enable members to gain plant knowledge and propagation experience.

Walks and excursions to places of botanical interest varying from gardens to wilderness areas are available to members. These are graded as follows:

A — mostly driving, short walks;

B — more walking, easy paths; and,

C — long walks, uneven ground.

The trip leaders have the right to deny excursion participation to those whose health or fitness is not compatible with the grading of the walk.

Collecting in the field is not APST Inc. policy on official excursions. Permits are required in National Parks etc.

MEMBERSHIP SUBSCRIPTIONS

Please see New Membership Application Form for Membership fee information, overseas payment options together with details for concession eligibility.

For new members, subscriptions are valid until the relevant anniversary of the date of payment.

Subscription Payments may be made directly into the Society’s account at any Westpac Bank or by Electronic Funds Transfer.
